GOOD REASON FOR PROTEST.

There can be no surprise at the rotest which has been made over the in which the people of Estill Tennessee, took a Negro who had shot two white men out to a stake, ing him with red hot irons until he confessed burned him to death.

That is brutality of the worst sort. It is in keeping with some of the methods which have been employed by the Germans and the Turks in connection with the war, and yet this act has occurred under peaceful con-ditions in a community which would have thrown its hands up in horror at

crime. The great objection comes from the fact that the people of that community absolutely threw all law and order to the winds, disregarded the pleadings of the authorities that the law he allowed to take its course and proceeded to take matters into their own hands that the life of the man

They recegnize that it is going to bring to them in some quantity at least the foodstuffs from the lack of which they have been undergoins great suffering, and that it means that there is going to be a much shorter battle line. In this connection it is worthy of note that the News points out the great rejuctance in Austria they are the present of Schelies Brit.

"Naturally this made my relations with the mothers of little girls somewhat strained. They always said politically that it didn't matter in the least—and then they would take their off-their party lists with a large black lead pencil. Farmers Test Your Own Seed.

Mr. Editor: Just a line or two bout the importance of testing seed about the importance of testing seed corn this year and my experience in regard to it. Last year there was a large amount of corn that did not refere and therefore a large duantity that will not germinute. I tested for ty-two ears of as handsome corn as one seldom sees which looked as though every kernel would grow, but much to my surprise only ten ears proved fertile. Four kernels were taken from each ear and planted in good soil. We cannot afford to loose valuable time and labor and seed, by planting that which we do not know about it is necessary this year to make every hour count to support the government and/many things done now will help a whole lot toward a successful year. Brothers, let us get into the collar and lift. And have into the war.
